

I AM ALS launched a fully redesigned website!

It focuses on improving the user experience, with simplified language, a search bar, compatibility with all browsers and optimized function for impairments and disabilities.

What's new you ask?

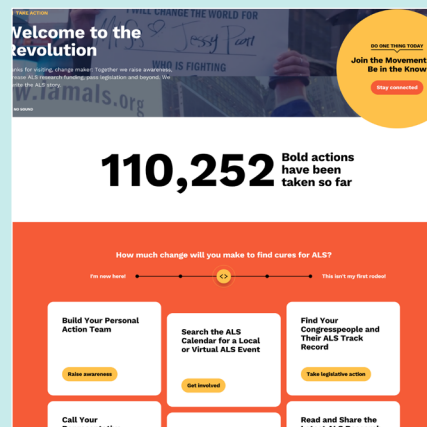

Navigation

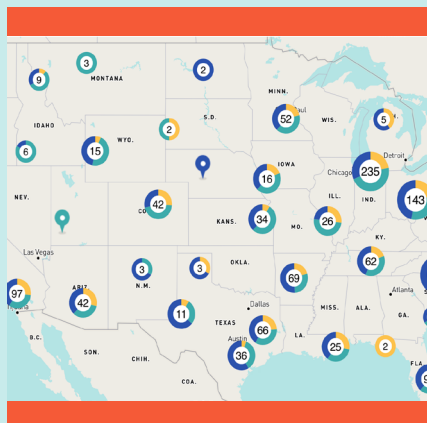

We surveyed the community, and more than 800 advocates told us what they need to navigate ALS. The I AM ALS Navigation program meets those needs, featuring expansive resources to address evolving concerns at every step along the ALS journey.

The campaign-style approach empowers and mobilizes people to join the I AM ALS revolution at any level with turnkey actions that impact change.

Action Page

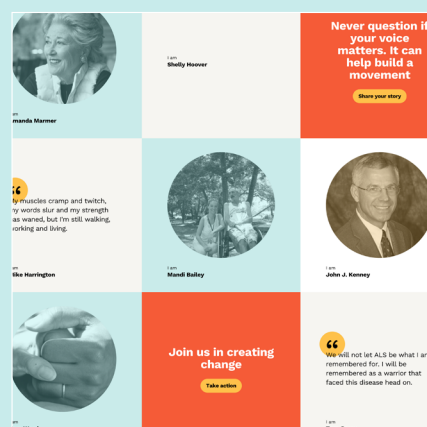

Every Community Map

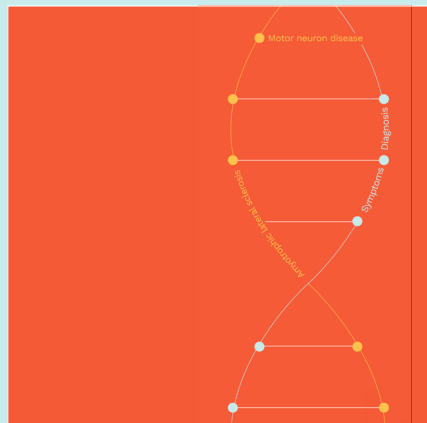

With almost 2,000 and counting contributions, this U.S. map shows that ALS impacts every community and every congressional district across the country, including yours.

The site features more than 100 stories from every facet of this movement. These legacies are displayed in a story wall to help lift up those impacted by ALS and other neurodegenerative diseases.

Story Wall

ALS Research

This features the latest in scientific discovery on our mission for treatments and cures.

Check it out.
Join the revolution.
